

Did you know?

Developing independence has many benefits: increased academic success, increased motivation and confidence and improved awareness of students' own strengths and weaknesses, as well as how to manage these.

Independent learning isn't about working alone: teachers and parents still need to support and enable the learning that is needed in this time so that it is structured, productive and effective. We can't expect children to just 'know' how to work independently as well as effectively, they will need some guidance and support.

Independent learning is most effective when students can be encouraged to self-regulate their own learning and behaviour.

 Key
 Points

What can you do?

Discuss your child's areas of strength and weakness, across the subject range they are studying, but also within each subject and topic. Independence isn't just about working, it's about reflecting on their progress and performance and considering where their time would be best spent.

Discuss the different ways your child could study, whether through booklets or textbooks, apps and other options. There are many ways to revise and most students have a preference, but often a combination is the most effective. The PiXL apps we have available, such as the Maths app, can dovetail well into a revision schedule, alongside practice questions and revision of topics that they are unsure of.

If your child doesn't have them already, ask their class

teachers for the PiXL Independence materials that we have created. These are available for most subjects and provide a variety of different tasks, along with a credit system, to help structure their revision whilst also developing their independence.
